JIN NUA

Author, Lecturer, Man of Nature

EDUCATION

University of Missouri-Rolla, USA

1986 - Bachelor of Science - Mechanical Engineering

SUMMARY OF NUA ROLES/POSITION CAPABILITIES

Nua has authored over ten books in his Centerpath Book Series. He is a recognized thought and spiritual leader.

Nua draws on a wealth of knowledge and life experiences to create what some consider the greatest ideas alive today including his Centerpath, Centerlife, and I-Citizen formulizations.

Nua's background includes an analytic engineering background, regional executive, a spiritual transformation in 1998, and over 25 years travelling overseas studying various religions and cultures.

Of all his studies though, Nua's greatest teacher is nature herself. Having mastered her timeless and all-encompassing wisdoms, Nua is considered the foremost expert on nature's processes and how they relate to our lives.

Nua is passionate about changing the world for the better. His life practice Centerlife provides groundbreaking techniques to uplift and enhance lives through emulating nature's successful formula which is simply through nurturing the various centers of our life.

Not satisfied with individual growth plan alone, Nua also developed a system of governance labeled i-Citizen which provides a practical framework for society to govern itself again, in accordance with nature's laws and wisdom.
